Work Experience

Milanb0z Agency FullStack Developer & Designer
Jan 2021 - Present

- Designed and developed custom, responsive websites tailored to client needs, enhancing their online presence.
- Collaborated closely with clients to deliver personalized digital solutions, meeting their unique business goals.

Education

The School of Electrical and Computer Engineering of Applied Studies Belgrade - College
SEPT 2020 - OCT 2024

The High School of Electrical Engineering "Nikola Tesla" Pančevo - High School
SEPT 2016 - JUN 2020

Projects

Bug Tracker
TypeScript, React, Node, MongoDB, Docker, Github Actions

- Developed and designed a full-stack application using the MERN stack, with integrated Docker CI/CD.
- Featuring real-time tracking of active users via WebSockets, a comment tagging system, real-time notifications, and much more for enhanced collaboration.

Forms Manager
React, Node, MongoDB, Docker, Github Actions

- Built and designed a school project inspired by Google Forms using the MERN stack, delivering a user-friendly platform for form creation and submission.
- Features a Drag-and-Drop form builder, multiple question types, and email invitation functionality with tracking capabilities.
