Milan Božić

Pančevo, Serbia | +381 63 8423-455 | milanb0z.dev | LinkedIn

Specialized in **frontend development** using **React**, with strong knowledge in **backend technologies** like **Node.js** and **MongoDB**. I have experience building scalable web applications for clients like **Heineken**, **IQOS**, and **Make My Home**. Looking to leverage my expertise in a full-time software development role.

EDUCATION

The School of Electrical and Computer Engineering of Applied Studies   Belgrade, Serbia
College - Computer Science   Expected June 2025

The High School of Electrical Engineering "Nikola Tesla"   Pančevo, Serbia
High School - Computer Science   July 2016 - July 2020

EXPERIENCE

UpWork, Local (Part Time)   Remote
Frontend Developer & Designer   Jan 2021 – Oct 2024
- Specialized in **frontend development with React**, delivering responsive, high-performance user interfaces with animations and CMS integrations.
- Developed **full-stack applications** with **React**, **Node.js**, **Express**, and **MongoDB**, integrating **RESTful APIs** for scalable web solutions.
- Built websites and web applications for various clients, including well-known brands like **Heineken, IQOS,** and **Make My Home**.

PROJECTS

AutoDnevnik
- Built with the **MERN stack**, featuring a **React** frontend for an intuitive experience and a **Node.js & Express** backend with a **MongoDB** database.
- Initially developed as a tool for my dad's workshop, AutoDnevnik has evolved into a platform with **active daily users**, including multiple workshops.
- Designed for real-world use, handling daily service entries and growing user engagement, with **authentication**, **role-based access**, **real-time updates**, and **Google OAuth login** for seamless user access.

Formr - Google Forms Clone
- Developed with the **MERN stack** as a school project, enabling users to **create and complete forms**, featuring a **drag-and-drop builder** with customizable question types, including checkboxes, radio buttons, and text inputs.
- Includes an **invite feature** that sends form invitations to users' emails, tracks their responses, and monitors **completion progress**, providing real-time updates on form status and user participation.

ACHIEVEMENTS & ACTIVITIES

1st Place at Game Hackathon   March 2020
Metropolitan Belgrade
- Led a team to victory, showcasing problem-solving skills, teamwork, and technical expertise in a high-pressure environment.

1st Place at Game Hackathon   March 2019
Metropolitan Belgrade
- Successfully collaborated with a team to develop a game prototype, showcasing effective communication, task management, and innovation under tight deadlines.
